

Children will now be checking out AR books in the library that will be on their reading level. Children will take a comprehension test on the book they have read on the computer. A score of 70 and above is passing.

Your child will be receiving two grades for Accelerated Reader this nine weeks. One grade will be for reaching his/her goal. A second grade will be the average of his/her tests taken. The goal for this nine weeks is eight tests passed. The goal for the last nine weeks of school will be twelve tests passed.

You probably have many AR books at home. You may go to [www.arbookfind.com](http://www.arbookfind.com) to look up books to see if they are AR books and also to find out the reading level of the book. Children may read books from home that are on their level and take a test at school. There are also AR books in our classroom that children may read. Children may read and take tests during any free time and also at computer lab. Please encourage your child to work toward his/her goal and to read carefully before taking a test.

If you have any questions, please don't hesitate to ask. Thank you for your support in this reading program.
